Shashi Shanthan

AI-Enabled Full Stack Developer | React · Node.js · Cloudflare Workers · Generative AI
shashishanthan2706@gmail.com · +91 6304380138 · Bengaluru, India · LinkedIn · GitHub · Portfolio

SUMMARY

Full-stack developer focused on building and shipping AI-integrated web applications end-to-end — from rapid prototyping to deployed backend. Comfortable working across React, Node.js, and edge/cloud infrastructure, with growing depth in applying LLMs and vector search inside production tools. Pairs strong fundamentals with an AI-accelerated workflow (Cursor + Claude) to move from idea to deployed product fast, without skipping on code quality or system design.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java
Frontend: React.js, React Hooks, Tailwind CSS, HTML5, CSS3, Responsive Design
Backend: Node.js, Express.js, REST API Development, WebSockets
Cloud & Edge: Cloudflare Workers, Workers AI, Vectorize, D1, Durable Objects, Vercel
AI Integration: LLM Integration, Prompt Engineering, RAG, Vector Embeddings, Cursor + Claude (AI-assisted development)
Databases: MongoDB, MySQL, Cloudflare D1, Supabase
Tools: Git, GitHub, VS Code, Wrangler CLI, Payment Gateway Integration (Razorpay)

EXPERIENCE

Full Stack Engineer Intern *ULICA (ulica.in) · Bengaluru, India* *Aug 2026 – Present*

- Work on the live e-commerce website of ULICA, a clothing brand, contributing to frontend and backend tasks assigned by the team.
- Build and update frontend pages and components, and fix UI bugs to keep the storefront responsive and consistent.
- Write and update REST API endpoints and connect them with the database for store features.
- Debug and test changes, and submit code through Git and GitHub with reviews from senior developers.

PROJECTS

HireSight *Cloudflare Workers · Workers AI · Vectorize · D1 · Durable Objects · React*

- Built and deployed a full-stack AI hiring screener solo, from zero to a live product.
- HR pastes a job description, candidates upload resumes, and the tool scores each one 0–100 with a generated reason — leaderboard updates live as new applicants come in.
- Integrated 5 Cloudflare primitives in a single architecture: Workers for routing/API logic, Workers AI (Llama 3.1 8B) for scoring, Vectorize + bge-base-en-v1.5 for resume–JD semantic matching, D1 for persistence, and Durable Objects for real-time leaderboard state.
- Currently rebuilding toward a production-ready two-sided platform — separate HR and candidate roles, authentication, recruiter dashboards, and multi-job pipelines.

TechVault *React.js · Node.js · MongoDB · REST APIs · Razorpay*

- Built a full-stack e-commerce website, TechVault, for selling electronic gadgets — mobiles, laptops, speakers, watches, and more — with persistent cart state, user authentication, and a REST API–driven product catalog.
- Implemented end-to-end Razorpay payment integration — order creation via Razorpay Orders API, frontend checkout flow, and backend signature verification to prevent unauthorized payment confirmation.
- Built a webhook endpoint to handle asynchronous payment events (success, failure, refund) and sync order status in MongoDB accordingly.
- Optimized API-driven UI rendering, reducing unnecessary re-renders and improving perceived load performance.

UNO Multiplayer Card Game *JavaScript ES6+ · Socket.IO · React · Real-Time Systems*

- Built the frontend for a real-time multiplayer card game supporting 4 concurrent players, consuming live Socket.IO events to keep UI state synchronized across all clients.
- Implemented real-time turn indicators, player action states, and room-based lobby UI, ensuring the interface reflected game state changes with minimal lag.
- Handled client-side edge cases around player disconnects/reconnects — recovering UI state and turn indicators without breaking the player's session.

EDUCATION

Indian Institute of Technology, Patna — Bachelors in Computer Science and Data Analytics *2024 – 2028*
PW Institute of Innovation — 4-Year Program in Computer Science & Artificial Intelligence *2024 – 2028*

ACHIEVEMENTS & CERTIFICATIONS

- 1st Place — Bug Hunt, AZURA 2k25 National Technical Symposium, competing against 150+ participants across India
- Represented IIT Patna at Cloudflare IRL Bengaluru Hackathon (Jun 2026) — built and demoed a live AI product
- Solved 200+ DSA problems on LeetCode and GFG covering arrays, trees, graphs, and DP
- Completed Namaste Dev React Course — advanced hooks, performance optimization, and production patterns
